Education

Master of Science, Cloud Computing September 2024
University of Maryland Global Campus

Bachelor of Science, Middle School Education August 2022
University of Maryland College Park

Certifications

Microsoft Certified: Azure Fundamentals (AZ-900) March 2025

Technical Skills

Platforms and Tools: Amazon Web Services (AWS), Microsoft Azure, Nginx, Wireshark, PowerShell, Bash, Docker, Linux, Jamf
Cloud Infrastructure: Infrastructure as Code (IaC), Cloud Networking (VPC, Subnetting, Security Groups), Cloud Active Directory Management, Virtual Networks, Cloud Virtualization, Cloud Migration, AWS CloudWatch

Experience

IT Services & Digital Systems Coordinator | ILIA *Baltimore, MD* | April 2025 – Present
November 2022 – September 2023

- Provided **technical support** and troubleshooting via email, telephone, and **Salesforce ticketing systems** to customers, achieving **95% issue resolution** and user satisfaction rates
- Configured **Jamf** and **Apple Business Manager** and user authentication via Google Workspace, to enroll and manage company devices
- Built a cross-platform automation script leveraging **Google App Scripts**, and **Google Drive APIs** to parse job description documents and output structured data into Google Sheets, reducing manual entry time
- Designed and delivered **50 training webinars** and seminars targeting students and educators, equipping participants with **digital literacy** and leadership skills
- Tailored **cybersecurity training** curriculum and conducted training sessions for nonprofit and community organizations, strengthening operational resilience
- Facilitated **data collection and analysis** efforts by designing surveys and questionnaires and analyzing results to support program managers and leadership in strategic planning and decision-making
- Leveraged data insights to plan and propose new programming initiatives, expanding program engagement to **185 participants**
- Integrated **Salesforce CRM** to manage course content, scheduling, class registration for over 50 course offerings, optimizing registration workflows
- Conducted hands-on labs to build impact **websites** and **digital marketing** campaigns with students, fostering an **agile development** environment

AV Specialist | Dar-us-Salaam *College Park, MD* | January 2018 – September 2023

- Collaborated with cross-functional teams and external vendors to manage logistics, **IT resources**, and **digital infrastructure**, delivering over 100 educational and social events
- Configured and managed livestreaming systems using **OBS Studio**, YouTube Live, and **network-based AV equipment**, expanding audience reach to **8000+ cumulative viewers** over 50 broadcasts
- Oversaw setup and troubleshooting of professional-grade audio and visual system equipment, including **XLR microphones**, **digital mixers**, and **projection systems**, achieving **98% broadcast uptime** across events

Technical Operations Specialist | StallionTek *Upper Marlboro, MD* | January 2017 – August 2018

- Led installation and configuration of company-wide **computer systems**, **networks**, and peripherals, improving system uptime and functional performance for over 50 employees
- Automated and customized **Windows 10 laptop deployments** using **Sysprep** and **imaging tools**, ensuring compliance with company IT standards
- Authored and maintained **technical documentation** and **quality assurance protocols**, ensuring consistent process governance and secured **ISO-9001 certification**
- Developed **SOPs** for inventory management software best practices, enhancing operational efficiency

Technical Projects

BallotOnline Cloud Migration | *AWS, Azure, VSCode*

- Conducted a 5-year TCO analysis identifying **$430K in cost savings** through a hybrid **AWS-Azure deployment** strategy
- Designed and implemented a secure cloud migration plan adhering to **AES-256 encryption** and **GDPR compliance**, deploying identity-based access controls (**IAM**, **RBAC**) across **multi-cloud environments**
- Automated **multi-region provisioning** with **AWS CloudFormation**, **CLI**, and **Azure ARM templates**, reducing deployment time by over 70%
- Deployed scalable **AWS infrastructure** components (**EC2**, **S3**, **RDS**, **IAM**, **VPC**) with **encryption at rest** (**AES-256**) and in transit (**TLS 1.2**), applying least-privilege access policies to achieve enhanced data security

Homelab Deployment | *Linux, Docker*

- Repurposed a desktop PC into a secure **Ubuntu-based** private **cloud environment** hosting **Dockerized** services (Nextcloud, Portainer, Firefly III, Technitium DNS) for centralized system and data management
- Implemented **Pi-hole** and **Tailscale VPN** for **encrypted remote access**, blocking over 95% of trackers and securing home network
- Configured **automated backups**, observability with **Glances**, and **container orchestration** through **Portainer**, simulating **enterprise-grade cloud operations**
